Contents:

CHAPTER 1

Installation

1.1 Create the brome project using cookie-cutter

Install cookie-cutter:

```
$ [sudo] pip install cookiecutter
```

Create the brome project:

```
$ mkdir brome_project
$ cd brome_project
$ cookiecutter https://github.com/brome-hq/cookiecutter-brome
```

1.2 Create a virtual env *[optional]*

Install virtualenv and virtualenvwrapper:

```
$ pip install virtualenv virtualenvwrapper
```

Add this line to your .bash_profile:

```
source /usr/local/bin/virtualenvwrapper.sh
```

Reload your .bash_profile:

```
$ source ~/.bash_profile
```

Create your virtualenv:

```
$ mkvirtualenv venv
```

Activate the virtualenv:

```
$ workon venv
```

1.3 Install brome

```
$ pip install brome
```

CHAPTER 2
